

StressRoute™

Training

Balfour Beatty

StressRoute™ is a visual software package designed to record, monitor and manage stress-related data. If you've purchased StressRoute™, our one-day course helps you expand your skills and confidence.

Monitoring stress-related maintenance work on rail infrastructure and metro networks can be resource-dependant, time consuming and costly.

We've designed a StressRoute™ course that helps users fully understand the software and how they can save valuable processing time to ensure maximum return on investment.

Course overview

Our one day StressRoute™ course is delivered using a mix of explanations and demonstrations combined with a series of exercises providing delegates with plenty of hands on experience.

The course includes useful guidance and explanations of the software's functionality from opening a database to producing reports.

At the end of the course each delegate will be presented with a certificate to confirm their attendance.

Delegates are also provided with comprehensive course notes to take away for future reference.

We recommend a maximum class size of four to ensure each delegate receives maximum attention from the tutor and has access to the appropriate equipment.

What you will learn

- Introduction to the StressRoute™ database
- Explanation of all windows in StressRoute™
- How to create a new database
- How to add, edit and delete data
- Explanation of the viewing options
- An introduction to some additional database tools
- How to produce reports, including report options
- How to import and export data

Logistics

- The course starts each day at 9.30am and finishes at 4.00pm
- A buffet lunch is provided
- The course is delivered from our office in Matlock, Derbyshire
- If you require the course to be held at an alternative location please contact us for information and prices

Course costs

2018 price per delegate, excluding VAT:

1- 2 delegates	£632
3 delegates	£569
4 delegates	£537
